

Ananya Gope

ananyas.gope@gmail.com • 484-507-2142 • [linkedin.com/in/ananya-gope](https://www.linkedin.com/in/ananya-gope)

Biomedical Engineering and Business Management student passionate about creating healthcare solutions that are both technically thoughtful and meaningful to the people who rely on them. Experienced in research and product development, with a multidisciplinary approach to solving complex problems.

Research & Work Experience

Nori — AI Powered Patient Caregiver Support Startup | Allentown, PA

June 2026 – Present

Founder & Product Lead

- Accepted into the HyperCase Incubator at Case Western Reserve University to develop Nori from prototype toward user testing
- Built a working prototype of an AI-powered caregiver support app to help families coordinate care and navigate health decisions
- Building and leading a 5–7 member product team, establishing individual goals and responsibilities, setting product milestones, and coordinating execution toward a demo with a test user group.
- Leading product strategy, user research, and development, incorporating stakeholder and user feedback into product decisions
- Designed early-stage healthcare integration workflows to support coordination across providers and patient information systems
- Prototype: <https://noriapp.info/>

Global Health Design Collaborative, Case Western Reserve University | Cleveland, OH

February 2026 - Present

Bilimeter Project Team Member

- Designed a design of experiments (DOE) for a skin phantom validation study to systematically evaluate device performance across experimental conditions.
- Researching existing transcutaneous bilirubin (TcB) devices and engaging with local hospitals to gather operational insights and benchmark existing technologies.
- Presenting project progress, experimental plans, and future development priorities to stakeholders and organization members.

Dr. Kath Bogie Lab Case Western Reserve University | Cleveland, OH

September 2025 - Present

Biomechanical Undergraduate Research Assistant - Gyroid Cushion Project, Soletracker Project

- Fabricated 30+ modular wheelchair cushion prototypes and conducted mechanical characterization testing under varied temperature and bleaching conditions to evaluate material performance.
- Performed displacement and creep testing of gyroid cushion inserts, generating experimental data to assess durability and long-term material behavior.
- Analyzing experimental results and contributing to a manuscript for publication based on the Gyroid Cushion Project.
- Supported human participant trials at the Louis Stokes Cleveland VA Medical Center, assisting with data collection and evaluation of a pressure-sensing system for wheelchair users.

Aropha (AI Biodegradability Testing Startup) | Bedford, OH

May 2026 – June 2026

AI Visibility & Content Operations Project Contributor

- Designed and implemented AI-assisted knowledge management and content operations workflows that transformed expert interviews into scalable organizational assets.
- Generated 3,000+ LinkedIn and forum impressions and contributed to increased AI-search visibility, measured through periodic baseline audits and confirmed new client acquisition.
- Artifacts: aropha-comparison-page.tiiny.site

Young Chefs Academy | Allentown, PA

April 2021 - August 2025

Marketing Assistant

- Attracted 100+ new clients by executing multi-channel marketing campaigns across events, email outreach, and social media.
- Processed 1,500+ student transactions using Mindbody POS, improving booking and attendance tracking systems.
- Led classes of 20+ students, delivering 3–6 recipes per session using interactive teaching techniques.

Zhu's Lab Case Western Reserve University | Cleveland, OH

February 2025 - May 2025

Polymer Engineering Lab Assistant

- Conducted solution preparation, electrospinning, and tensile testing to evaluate material performance.
- Supported early-stage research identifying optimal solvent concentrations to maximize piezoelectric properties in nanofibers.

Projects

Artificial Intelligence RNA Sequencing | Inspirit AI

- Collaborated with 5 peers to develop, test, and present a logistic regression model classifying SARS-CoV-2 genome sequences by geographic region.

Education

Case Western Reserve University | Cleveland, OH

Expected Graduation May 2028

B.S. Biomedical Engineering (Biomaterials Concentration), Secondary Major in Business Management

- **Relevant coursework:** Signals and Systems, Introduction to Biomaterials, Physiology (Biophysics), Circuits, Statics, Physical Chemistry, Organic Chemistry, Multivariable Calculus, Differential Equations, Foundational Engineering & Programming

Global Exchange Program - NTU's GEM Trailblazer Exchange Program

- **Relevant coursework:** Introduction to Data Science and Artificial Intelligence, Organizational Behavior and Design

Technical Skills

Programming & Data Analysis: Python, MATLAB, R, JMP Statistical Software, Microsoft Excel

Engineering & Design: AutoCAD, Onshape, TinkerCAD, 3D Printing, Laser Cutting, Technical Sketching, Prototyping, Circuit & Electronics Assembly

Laboratory & Experimental: Mechanical Characterization, Tensile Testing, Creep Testing, Electrospinning, Aseptic Technique, Bacterial Culturing, PCR, Gel Electrophoresis, Microscopy, Sample Preparation & Analysis

AI & Productivity: Claude, ChatGPT, AI Workflow Design, Prompt Engineering, Microsoft Word, PowerPoint

Certifications

- CITI Human Subjects Research Training – Biomedical Research Faculty, Staff, and Students | Issued Sep 2025 | Expires Sep 2028
- Claude 101 – Anthropic | Issued Jun 15, 2026
- AI Fluency: Framework & Foundations – Anthropic | Issued Jun 16, 2026

Research & Scholarly Work

Comparative Assessment of Ayurvedic and Allopathic Methods | Research Archive of Rising Scholars. (n.d.).

- Description: Comparative analysis of Ayurvedic and allopathic medical decision-making under mentorship of Dr. Nguyen, MD/PhD, MIT Fellow
